

# Bridge Clip

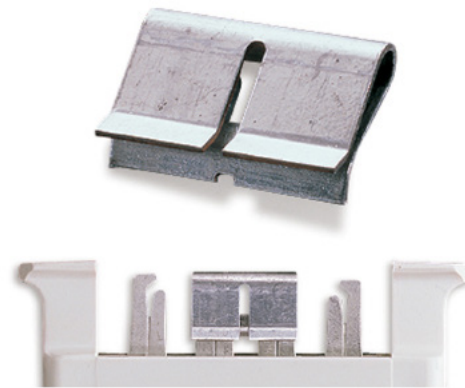

Part Number: 180190  
AT&T Item Number: BLD.10573

## Overview

The two-position bridging clip shall be used to bridge connections on a 50-pair 66 block. Copper pairs are terminated on the left and right side of the 50-pair block, while the bridging clips shall be installed onto the middle two clips. This connects the two sides and gives the cross-connect its signal. This type of connection shall provide quick disconnects for turning off and on signals. The bridging clips are easy to remove for isolating and testing incoming pairs from outgoing pairs.

## Standard Features

- Used with 50-pair blocks, are reusable and easy to use
- Available in packs of 100 pieces
- Made of phosphorous bronze
- UL listed
- ANSI/TIA-568-C
